

Git & GitHub Assignment

Employee Management Project Objective: Practice Git & GitHub basics including setup, repository creation, file tracking, push, and clone. Task

1: Configure Git Verify Git installation and configure your username and email. Task

2: Create Local Project Create a new folder for the employee management project and initialize it as a Git repository. Task

3: Create Employee File Create a file named employees.txt and add employee details such as ID, Name, and Role. Task

4: Track Changes Check the status of your project, add the employee file to tracking, and commit the changes. Task

5: Create GitHub Repository Go to GitHub and create a new repository named 'employee-management'. Task

6: Connect and Push Connect your local project to the GitHub repository and push your changes. Task

7: Update File Add a new employee to the file and update the repository with the changes. Task

8: Clone Repository Clone the repository to another location or system and verify the files. Bonus Challenge: Create a new branch, make changes, and push it to GitHub.

Submission: Submit the GitHub repository link and screenshots showing each completed step
